Dear Er. Raj Shah,

I am writing to apply for the Hospital Management System Development Intern position at Nirwana Infratech Engineering Pvt. Ltd., Biratnagar. I am currently pursuing my Bachelor's degree in Information Technology/B.Tech.Ed and am eager to gain practical experience in real-world software development.

I have hands-on experience working with HTML, CSS, JavaScript, PHP, MySQL, and the MERN stack (React, Express, MongoDB). I have also worked with Django for backend development and completed UI/UX design training using Figma.

As part of my academic projects, I have developed a Cosmetic E-Commerce Website using the MERN stack, a C++ Learning Platform using Django, and a web-based Learning Management System (LMS) with CRUD operations. These projects have helped me gain practical experience in full-stack development, database handling, and building user-friendly applications.

I am a quick learner, dedicated, and highly motivated to contribute to your team while improving my technical and professional skills. I am confident that this internship will provide valuable industry exposure and learning opportunities.

I would welcome the opportunity to further discuss my application. Thank you for your time and consideration.

Sincerely,
Jiya Fatma
